

YOUR **TRUSTED, FULL-SERVICE** PARTNER FOR INTERIOR CONSTRUCTION

At Continental Office, we've been in the interior construction business for over 20 years. In that time, we've seen it evolve with the need to be **faster, flexible, and more sustainable**. That's why we created CoBuild to help you build better.

A **BETTER** WAY TO **BUILD**

CoBuild was created specifically to support the construction industry with modern technology, design freedom, and reduced timelines. We believe you should be able to **construct your vision with confidence** and without fear of the unknown. Whether you're building a commercial office, healthcare space, or educational environment, this is **personalized prefab construction at its best**.

Yokoso Center

DO IT RIGHT WITH **CUSTOMIZATION**

Featuring DIRT Environmental Solutions®, CoBuild's creations are completely customizable. The layouts, finishes, and customizations of DIRT are endless, including dozens of eco-friendly finishes from paints and fabrics to wood veneers, in a variety of colors. There's something to **meet every design need and function**, for any business. DIRT is built-to-specification to meet the constraints of the physical space it resides within, with no standard sizes for designers to adhere to.

BUILT TO YOUR VISION

When your team's needs change, what happens to their space? **Flexible construction solutions** like DIRTT give you more choice and adaptability, with walls that can be moved from one space to another, changed from glass to solid material, writeable walls to embedded technology, etc. - adjusting to changing needs much **easier, faster, and cleaner** than conventional construction.

THE TRADITIONAL APPROACH

THE DIRTT APPROACH

SAVE TIME AND MONEY

It Saves Time

With live 3D visuals, you see the design vision, make necessary changes in real time, and eliminate errors and deficiencies to less than 1%. **Projects are delivered in four to six weeks rather than the industry standard of 12 weeks.** Plus, we can create and secure quotes three times faster than conventional construction.

It Saves Money

Using ICE® software, each piece is instantly priced, so you don't receive the typical ballpark "estimate" - it's an **exact, transparent quote** straight from the manufacturer! There's **virtually no waste or excess material**, better on your wallet and our environment.

Let's build better together today, so you can tackle what comes tomorrow with confidence.
